ABOUT ME

Hello! I am Dilshod. I was born in UZBEKISTAN in 21/08/2003. I am intersted in programming and I am web developer. I produce front-end part of websites by **'React-js'**, I love working on myself! I want to work with friendly team. I want to do useful things and make benefit in my life. It is my big dream!

EDUCATION

• **'P.Sobirov' Secondary school 2010-2021**

I started studying at 'Primary' school in 2010, and in 2014 started studying at 'Secondary' school. 2021 is my graduated year!

• **Teamit academy 2021-2022**

I preferred to learn web-programming in the training course instead of University, because I believed in learning web programming faster in training courses than in university! So I managed to learn 'Front-End-producing' in one year!

EXPERIENCE

• **Knowledge at Home 2022-2023**

I learned extra technologies at home after I had finished programming course. So, I learned **'Using-Json-Server'**, **'React-Js'**, **'Redux'**, **'Firebase'**, **'React-Router-Dom-v6'**, **'Authorization'**, **'Authentication'**, and **'Working-With-Dashboard'**

• **Teamit Coders 2023-2024**

I learned making web systems with own profile. System that I made works with private page (private-route react-js). I also learned uploading files from device to storage. Maybe my skill is simple, but i believe it will be useful! I want to make benefit for everybody in the life!
